

TAFT AVENUE SEWER IMPROVEMENT PROJECT

Orange County Sanitation District (OC San) provides wastewater collection, treatment and recycling services for approximately 2.6 million people in central and northwest Orange County. The OC San Taft Sewer Improvement Project is part of a large capital improvement program to maintain and improve regional sewer infrastructure.

About the Project

The project will replace and relocate a portion of the Taft Sewer in the City of Orange. The project will upsize almost two miles of pipe along Taft Avenue from Glassell Street to Sacramento Street, northbound on Sacramento Street to Brentford Avenue, to Breckenridge Street to Meats Avenue. The current pipe ranges between 12 to 15 inches and will be upsized to 18 to 21 inches. A portion of the sewer that currently runs along Tustin Street will be relocated to North Sacramento Street.

Why Is This Infrastructure Needed?

OC San is committed to protecting public health and the environment by proactively replacing and maintaining its infrastructure. Increasing the size of the pipe as part of the project increases flow capacity to accommodate peak wet weather events and will also facilitate the future maintenance of the pipeline.

Schedule

2022	2023	2024	2025	2026
Design Start		Anticipated Construction Start		Anticipated Construction Completion
